Flo2Cash Web2Pay integration with Tienda

Version: 1.1

Date: 15/08/2010

## **1. Installing Flo2Cash as a Payment Processor into Tienda**

### **Step 1 – Unzip the module files**

Installing Flo2Cash payment module into Tienda is fairly easy. Just unzip all the files in the tienda.zip file to \plugins\tienda\ in your joomla/tienda install so that you have the following structure:

1. \plugins\tienda\payment\_flo2cash.php
2. \plugins\tienda\payment\_flo2cash.xml
3. \plugins\tienda\payment\_flo2cash\index.html
4. \plugins\tienda\payment\_flo2cash\tmpl\form.php
5. \plugins\tienda\payment\_flo2cash\tmpl\index.html
6. \plugins\tienda\payment\_flo2cash\tmpl\message.php
7. \plugins\tienda\payment\_flo2cash\tmpl\postpayment.php
8. \plugins\tienda\payment\_flo2cash\tmpl\prepayment.php
9. \plugins\tienda\payment\_flo2cash\tmpl\view.php

## Step 2 – Insert SQL

Run the following SQL to insert a basic Flo2Cash config into the system:

```
INSERT INTO `jos_plugins` (`name`, `element`, `folder`,  
`access`, `ordering`, `published`, `iscore`, `client_id`,  
`checked_out`, `checked_out_time`, `params`) VALUES  
('Flo2cash Payments', 'payment_flo2cash', 'tienda', 0, 5, 1, 0,  
0, 0, '0000-00-00 00:00:00',  
'f2cTestMode=1\r\nf2cAccid=123456\r\nf2cLiveProcessURL=https://s  
ecure.flo2cash.co.nz/web2pay/default.aspx\r\nf2cTestProcessURL=h  
ttps://demo.flo2cash.co.nz/web2pay/default.aspx\r\nf2cReturnURL=  
\r\nf2cHeaderImage=\r\nf2cHeaderBorderBottom=2dfdee\r\nf2cHeader  
BackgroundColor=cccccc\r\nf2cStoreCard=0\r\nf2cCSCRequired=1\r\nf2cDisplayEmail=1\r\nf2cfailed_order_state=10\r\nf2cnpayment_received_o  
rder_state=17');
```

### **Step 3 - Enable module**

1. After you have copied the files to the right locations, go to the Tienda Dashboard and then go to the payment setup screen by choosing Localization tab and then Payment Methods
2. If the files have been copied properly at the right places you should now see Flo2Cash as one of the payment options under Payment Modules list.
3. Click 'Edit Plugin Parameters' to the right of 'Flo2Cash Payments'

## Step 4 – Configuring the payment module

Configure Flo2Cash gateway as shown below or according to your requirement:

 **Tienda**

Version 1.5.22
